

J2S 360 — PROPOSAL

J2S 360 is an comprehensive & consultative program designed to fit the needs of each facility. Craft a solution that works for you by selecting from our portfolio of products & services.

Equipment Fulfillment

- **High Census in winter months?** J2S can supplement your needs with capital or rental equipment options. Using J2S can save you anywhere from 50-80% versus the manufacturer.
- **Switching to a new device?** Let us provide you with lightly used equipment. We repair, clean and test equipment to OEM specifications so that devices are good as new.

Maintenance & Parts

- **J2S offers depot repair services for equipment ranging from IV pumps to Endoscopes to Patient Monitors.** We offer a 5 - 10-day turnaround time on repairs.
- **If you need parts for in-house repairs** J2S can provide you with OEM New, Non-OEM New, or recertified parts at a cost savings.
- **PM Season?** Let us perform On-site PM services.

Education

- **Whether you need an instructional video or one-on-one education services,** J2S can accommodate your needs.
- **Technician and Nurse training** options available.

Pick-up and Delivery

- **Our pick-up and delivery services are free** and include a padded red tote, dedicated representative to fill out all repair paperwork, drop off repaired equipment, and management of parts requests. Your representative will work with you to schedule pick-up and drop off times.

Business Review

- **After each quarter of business, J2S provides a comprehensive business review** to its 360 customers. These business plans demonstrate cost savings, reveal possible areas for improvement, and suggest new ways to save money using our services.
